

SEPTEMBER 16, 2026 - OUDOMXAY PROVINCIAL HOSPITAL

With the support of LRF, Dr. Phetsamone and Dr. Senglar successfully performed bilateral congenital cataract surgery on Lisha, a four-month old girl from a low-income family in Khong District, southern Laos. Her arduous journey - by motorbike and bus from Khong District to Vientiane, followed by train to Oudomxay - took more than 26 hours.

Lisha will now make the long journey home with restored sight, a new set of clothes, and financial assistance to help cover her family's travel expenses. This is a truly life-changing outcome for this little girl and her family. Congratulations to Dr. Senglar and Dr. Phetsamone on a job well done!
